INTERNATIONAL SEARCH REPORT

International application No.

PCT/US02/06763

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)				
This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1. Claim Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
2. Claim Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:				
3. Claim Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)				
. This International Searching Authority found multiple inventions in this international application, as follows: Please See Continuation Sheet				
As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:				
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT	
·	
BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LA	ACKING
This International Search Authority has found 2 inventions claimed in the Interna	ational Application covered by the claims indicated
below:	,
This application contains the following inventions or groups of inventions which	are not so linked as to form a single inventive concept
under PCT Rule 13.1. In order for all inventions to be searched, the appropriate	e additional search fees must be paid.
Crown I alaim(a) 1 20 danning as smaller to file and	
Group II, claim(s)1-38, drawn to methods of detecting unknown biological agents	
Group II, claim(s) 39-48, drawn to methods of detecting single nucleotide polym	orpnisms.
and it considers that the International Application does not comply with the requi	irements of unity of invention (Rules 13.1. 13.2 and
13.3) for the reasons indicated below:	mements of unity of invention (reales 13.1, 13.2 and
, · · · · · · · · ·-	
The inventions listed as Groups I-II do not relate to a single inventive concept un	nder PCT Rule 13.1 because, under PCT Rule 13.2, they
lack the same or corresponding special technical features for the following reason	
Hurst et al (Rapid Communications in Spectrometry (1996) 10:377-382) teaches	
contacting nucleic acid from said bioagent with at least one pair of primers (page	e 378, column 1 and table 1), b) amplifying the nucleic
acid sequecne to produce an amplification product (page 378, column 2), c) deter	
(see page 378, column 2 and page 379, figure 1), d) comparing the molecular ma	ass to a known organism (page 379, figure 1). This
reference anticipates the claim thereby eliminating the special technical feature.	•
Continuation of B. FIELDS SEARCHED Item 3:	
EAST, MEDLINE, BIOSIS, CAPLUS	
search terms: bioagent, RNA, DNA, amplify, LCR, SDA, PCR, ligase, polyme.	rase, chain, strand, displacement, molecular, mass.
spectrometry, time, flight, quadrupole, analog, diaminopurine, single, nucleotide	e. polymorphism.
